Navigational simulator – Navi-Trainer Professional 5000 (NTPRO 5000)

Navigational simulators Navi-Trainer Professional enable simulator training and certification of watch officers, chief officers, captains and pilots serving on commercial and fishing ships with the gross tonnage of 500 tons and more. This complies with requirements of IMO STCW 78/95 Convention and Model Courses 7.01, 7.03 as well as number of specific tasks beyond the Convention. Simulator incorporated also the Transas GMDSS Simulator, VTS simulator, and possibility of join venture with ERS 4000 simulator.

Conventional training

- Ship handling training in accordance with STCW'95 requirements (Ship Handling, Bridge Team Management, Bridge Resource Management, ARPA/Radar, ECDIS, AIS, ...)

Special training

- Ship handling training in ice conditions;
- Training for naval applications;
- Custom designed courses upon request;
- Vessel traffic management training in accordance with IALA V 103 standard for the certification and training of VTS personnel.
