

Theory and Practices
of
**Marine
Pilotage**

Capt. Santosha K Nayak

Table of Contents

Introduction to Marine Pilotage	15
Who are Marine Pilots?.....	15
Duties and Responsibility of Marine Pilots	17
Maritime History of World and Role of Marine Pilots	21
Present Day Marine Pilotage– Inevitable Link in International Shipping.....	24
Essential Services Provided to World Trade and Economy.....	26
A Cost Benefit Analysis of Marine Pilotage – Role of pilots in Accident Prevention	28
PART –A (Procedures Related to Marine Pilotage)	
PART –A	33
Pilotage Services in Ports	35
Use of Port’s Pilotage Services by Ships.....	36
IMO Resolutions encouraging the use of pilots on board ships in certain areas.....	36
Pilotage Directions	37
Harbour Master’s Role in Pilotage – Marine Administration.....	38
Role of VTMS or Port Control Centre in Pilotage	42
Pilotage Techniques in Manoeuvring of Ships	43
Booking and Cancellation of Pilotage Services	47
Signals Associated with Marine Pilots.....	48
Pilot Transfer Procedures.....	53
Some Statistics Related Reasons that lead to Accidents: Significant Deficiencies	55
Risks Involved during Pilot Transfer Procedures.....	61
Regulations in respect of Pilotage Access and Egress.....	63
Safe Procedures for Boarding and Disembarkation.....	68
2 nd Most Prevalent Method of Pilot Transfer – Using Helicopters	73
Pilot Embarkation Platform System (Dangerous Trap-Door Mechanism)	74
Novelty Methods to Develop Full-proof Boarding Mechanism	76
A Case for Additional Safety: Mechanical Fall protection Systems.....	78
Master - Pilot Info Exchange (MPIX)	81
Pre-boarding Information Exchange and preparations	82

Information from Master in MPiX	83
Information from the Pilot in MPiX	88
Recounting the Paramount Duties of Pilot before Commencement of Duties.....	91
Various Plans drawn up by the Pilot for the Vessel's Movement	92
Conduct of Passage in Pilotage Waters	98

PART – B (Manoeuvring Techniques)

PART – B	101
Entering Pilotage Waters	103
What is Confined Waters?.....	104
Dangers associated with Confined Waters	104
Key Factors in Handling Vessels in Confined Waters	110
Checks Prior Entry into Harbour Approach Channel	113
Entering the Approach Channel to harbour	120
Safe Positioning of a Vessel in the Channel.....	127
2D- Configuration of Channel.....	128
Determining the Course to Steer (CTS)	130
Position of the Vessel w.r.t Centreline of Channel.....	131
Effective Set (Dash) in the Prevailing Circumstances	140
Tolerable Set in an Extremely Narrow Channel	143
Phenomenon of "Bow Kissing the Buoys"	146
Some Points on Bridge procedures for safe keeping of vessel in the channel.....	148
Shallow Water Effects & Channel Dynamics	149
What is Shallow Water Conditions?	150
The Concept of Nautical Bottom and its Application	151
Vertical Aspects of Vessel in relation to Depth in Shallow Water.....	153
Understanding Squat and Its Calculations.....	159
Shallow water Effects on the Vessel's Manoeuvrability	165
Channel Dynamics While Manoeuvring of Ships.....	170
Breakwaters & Hydro-dynamics in Proximity.....	173
Breakwaters and their Significance	173
Types of Breakwaters	174
Hydrodynamics near Breakwaters	179

Precautions to be taken while passing Breakwater	185
Tugs and Their Role in Manoeuvring	187
General Requirements for the Tugs	187
Design Types of Tugs	188
Operational Types of Tugs.....	196
Understanding the Power of Tugs.....	199
Number of Tugs to be used in Manoeuvring	200
Safe Operational Procedures for Using Tugs in Manoeuvring	201
Right Fairlead Position for Making Fast Position of Tugs.....	204
Making Fast of a Tug with the Assisted Ship.....	206
Correct Use of Tug Combinations at Various Legs of Passage	208
Casting off the Tug	210
Speed Control.....	211
Rule 6: Safe Speed.....	212
Essence of Speed Control.....	213
Making a Speed Reduction Plan.....	214
Options for Speed Reduction	215
Understanding Stopping Distance, Vessel Weight, and Acceleration.....	218
Concept of Balancing Rudder Angle (BRA) and Rudder Giveaway (RG) Point	226
Engine Types and their Optimal Usage	230
The Ship Drive Train	231
Basic Characteristics Features of a Main Engine.....	233
Types of engines and their Manoeuvring Potentials	235
Optimal usage of engines in Various Scenarios	237
Transverse Thrusters (At the Bow and/or Stern)	241
Azimuthal Podded Drive or Azipods.....	242
Carrying out a Safe and Effective Alteration of Courses.....	245
Understanding the Characteristics of a Rudder	246
Pivot Point and Its Position	248
How the vessel Turns - Controlling Forces.....	251
Directional Stability & Turning Ability.....	252
Wheel Over Point (WOP) While Altering Courses.....	253
Concepts associated with Execution of a Turn	255

Execution of Large but Unaided Alteration of Courses in Limited Sea rooms	265
Amalgamated Turn – (Turning + Reduction of Speed Together)	269
Manoeuvring Inside Harbour Limits	274
What is special inside harbours?	274
What are the keys in handling vessels in harbour?	278
Managing Sudden Onset of External Disturbances	283
Handling Different Types of Ships	285
Contingency Plans - Plan for the Unexpected Situations	290
Slow Speed Manoeuvres	295
What is Slow Speed Manoeuvring?	296
When a Vessel Resort to Slow Speed Manoeuvring?	296
Why slow Speed manoeuvring is Critical?	297
Thumb Rules of Slow Speed Manoeuvring	300
Various Options Available to Control the Ship at Slow Speed	301
Some Extreme Manoeuvres at Very Slow Speed	320
Approaching Berths	326
Checks To Be Carried out before Approaching to Berth	326
Checks while approaching the Berth	329
Vessel's Approach Speed to the Berth	332
Near-Berth Manoeuvres	334
Berthing & Moorings	344
Safe Berth	344
Significance of moorings	345
Moorings Procedure at the Berth	347
Managing Moorings in Special Situations	348
Moorings with the Buoys	351
Moorings with Anchors	352
Un-berthing and Outward Manoeuvre	356
Outward Paperwork & Information Exchange	357
Un-berthing Plan	357
Outward Near-Berth Manoeuvres	361
Casting off Tugs	364
Pilot Disembarkation	366

Emergency Manoeuvring Options	367
Emergency Scenarios while Manoeuvring in Port Limits	367
Vessel's Manoeuvring Characteristics.....	368
Understanding Stopping Ability of a Vessel	371
How the Crash Stop or Astern is executed?.....	375
Telegraph Failure - Emergency Operation of Engines from E/Room	377
Reduction of Speed after Engine Failure.....	378
Emergency Methods of Killing the Speed to Avoid a Disaster	379
Turning Ability at Max Rudder Angle in Open and Shallow Waters	381
Comparison between Effects of Crash Astern vs. Full Ahead and Hard Over Wheel	383
Special Operations.....	385
A. STS Operations	385
B. Single Buoy Mooring Operation.....	393
C. Customary Towing Operation	395

PART – C (Legal & Commercial Aspects of Marine Pilotage)

PART – C.....	407
Statutory Aspects of Pilotage	409
History of Regulations related to Marine Pilots.....	410
Designated Authorities that Regulate Pilotage Matters	412
Pilotage Regulations.....	413
Present Status of Pilotage Regulations in Various Parts of World	414
Pilotage Exemption certificates (PEC)	431
Administration by Harbour Master	434
Marine Pilotage Training.....	436
Pilot Training – An Adult Learning Process	437
Pilotage Training – A Brief View	439
International legislations on maritime pilot training and certification.....	441
IMO Resolution A.960 (23): Minimum Standards of Training for Maritime Pilots	442
Recommendation on Operational Procedure for Maritime Pilots other than Deep Sea Pilots.....	447
Legal Standing of a Marine Pilot in Various Situations.....	452
Pilot-Master Relationship Related to Responsibility.....	452
Legally Speaking, Who is a Pilot?	454

Pilot – An Integral Part of the Bridge Team or An Outsiders?.....	455
Risks of having an Adviser – Risks While Pilot is On Board a Vessel	458
Accidents during pilotage and the Aftermath	460
Fuel Efficiency in Marine Pilotage	466
Regulatory Initiatives to Reduce Emission	468
Initiatives in Marine operations of a Seaport to Reduce Emission	469
The Cost Saving and Green Agenda in Marine Pilotage	472
The cost saving Proposition of Marine Pilotage	474
The Book: “The Green Code of Marine Pilotage”	481
Appendices	485
Pilotage Law.....	487
Recommendations related to Pilotage Access and Egress	494-95
